

3.06.00.250623A

NOTE:

- This firmware is for N1C L-Series and 3PL-Series UPS systems only.
- It should only be used for SNMP cards that are version **3.05.##.##### or later** (3.05, 3.06, etc. (see **bold** below)
- It is the latest firmware offered for cards that are version 3.05.##.##### and later.
- It cannot be used on cards that have firmware version 3.04.##.##### or earlier (eg. 3.04.##.#####, 3.03##.#####, 3.02.##.#####, 3.0.1##.#####.)

To verify your SNMP cards firmware version, navigate to your UPS network card's IP address followed by "/version.txt"

It should look similar to this:

*KC502 version: KC502\_HW\_KC502\_V3.1 KC502\_V**3.06.03.250228A***

*hw 15, svn main, app*

*built at Mar 3 2025 09:14:38*
